

Civil Technology, Inc. (CTI) is a Denver-based professional services firm delivering Project Management as a Service (PMaaS), inspection, and project controls for complex public infrastructure programs. Founded in 1989, CTI brings more than 35 years of experience supporting aviation, transportation, and municipal clients through every phase of project delivery.

CTI operates as an embedded extension of the owner's organization, providing scalable expertise, disciplined governance, and consistent leadership across single projects or multi-project capital programs. Our service model emphasizes schedule certainty, cost control, quality assurance, and risk mitigation, supported by clear communication and accountability in highly regulated, operational environments.
